

**Notification: Important Change To Your Net Energy Metering (NEM) Account**

Dear Valued Customer:

We are writing to notify you that starting June 25th, 2018, Clean Power Alliance will be the new electricity provider for your area. Clean Power Alliance is the new, locally controlled electricity provider in Southern California. We are proud to bring clean, renewable power choices to communities across Los Angeles and Ventura Counties.

The purpose of this letter is to let you know about Clean Power Alliance and how our launch may impact your Net Energy Metering (NEM) Account. Our records indicate that your account(s) is taking service under one of Southern California Edison Company's (SCE's) optional Net Energy Metering (NEM) rate schedules.

With Clean Power Alliance nothing changes about your electric service other than who procures your electricity generation. SCE will continue to deliver power, send the bills, and be responsible for resolving any electricity service issues. They will continue to be responsible for monthly NEM electricity delivery service charges and credits, and Clean Power Alliance will now be responsible for monthly NEM electricity generation charges and credits. SCE will continue to provide maintenance, repairs, service, and billing just like they always have.

There are no duplicate or double charges and Clean Power Alliance charges simply replace what SCE would otherwise charge you for generation. When your service account(s) listed in the table below transfer to Clean Power Alliance, SCE and Clean Power Alliance will work together closely to continue providing your account(s) with NEM service.

<b>Customer Number:</b> <Customer Number>	
<b>Your NEM Account(s) will transition to Clean Power Alliance Service in June 2018</b>	
<b>Service Account Number</b>	<b>Service Address</b>

<Service Account Number>	<Service Address>
<Service Account Number>	<Service Address>

*This table may not list all of your accounts.*

Additional information to note, including benefits of Clean Power Alliance service:

- Once your account(s) transfers to Clean Power Alliance's NEM program, your account will be eligible for Net Surplus Compensation (NSC) from Clean Power Alliance, and will no longer be eligible for SCE's NSC rate. Clean Power Alliance currently offers a \$0.06/kWh generation credit, approximately double the amount currently offered by SCE.
- SCE will true up your account at the time you transfer to Clean Power Alliance. Your Clean Power Alliance service effective date is also the effective date of your new NEM relevant period for Clean Power Alliance and SCE.
  - Any SCE energy charges not offset by energy credits at the time of true-up will be billed to the customer.
  - Any SCE energy credits that exceed energy charges are set to zero for the start of the new relevant period.
- Clean Power Alliance will true up all customers on an annual basis each April. At the time of the annual true up, Clean Power Alliance will provide a cash out for any credits greater than \$100. Credits of less than \$100 value will roll over for the next annual period.
- Any NEM credits received from Clean Power Alliance cannot be used to offset SCE charges, and NEM credits received from SCE cannot be used to offset Clean Power Alliance charges.

If you have any questions about Clean Power Alliance's program or rates, we would love to hear from you! Please contact us at (888) 585-3788 or at [customerservice@cleanpoweralliance.org](mailto:customerservice@cleanpoweralliance.org).

If you have any questions regarding SCE's service, related programs or rate options, please contact SCE's Customer Contact Center at (800) 974-2356.

Sincerely,

Account Services  
Clean Power Alliance

### **Rate Definitions**

*Net Energy Metering (NEM) is applicable to customers who produce their own electricity, and who have eligible renewable energy generation systems connected to SCE's system (interconnected) and meet specific program requirements. The NEM option allows you to receive a credit for the surplus electricity you supply to the electric grid. This credit will then be applied to your energy bill, to offset all or part of the costs associated with the energy you consume each month.*
