2018 HISTORICAL CLEAN POWER ALLIANCE PRODUCT CONTENT LABEL [1]

100% Green energy matches 100% of your electricity usage. In 2018, 100% Green Power will be made up of the following new renewable resources averaged annually.

Green-e® Energy Certified New[2] Renewables in 100% Green Power 2018		Generation Location
-Wind	100%	Washington
Total Green-e® Energy Certified New Renewables	100%	

1. These figures reflect the renewables that we have contracted to provide. Actual figures may vary according to resource availability. We will annually report to you before August 1 of next year in the form of a Historical Product Content Label the actual resource mix of the electricity you purchased.

2. New Renewables come from generation facilities that first began commercial operation within the past 15 years.

For comparison, the current average mix of resources supplying Southern California Edison (SCE) includes: Renewable (32%), Nuclear (6%), Natural Gas (20%), Hydroelectric (8%), and Unspecified sources of power (34%). This resource mix was prepared in accordance with the California Energy Commission Power Source Disclosure program.

The average home in California uses 554 kWh per month. Source: U.S. EIA, 2017
