Your power choices.

Choose the energy source and rate plan that's right for you.

You now have a choice when it comes to your energy supply. Clean Power Alliance and Southern California Edison (SCE) encourage you to compare your choices and select the option that suits you best.

Understanding your energy choices.

This comparison illustrates the estimated electricity costs for a typical residential customer within Clean Power Alliance's service territory with an average monthly consumption of 554 kilowatt hours (kWh). This comparison is based on Clean Power Alliance rates approved by the Board of Directors and effective as of April 4, 2019. SCE rate options are based on rates published April 12, 2019. Both Clean Power Alliance and SCE's rates are subject to change.

Generation Rate reflects the cost of producing or purchasing electricity to power your business. This rate will vary depending on your service provider and rate plan.

SCE Delivery Rate is a charge assessed by SCE to deliver electricity to your business. This rate depends on usage.

Surcharges represent the Cost Responsibility Surcharge (CRS) and Franchise Fee (FF) that are applicable to Community Choice Aggregation (CCA) customers. The CRS is a surcharge to recover costs associated with power purchases made on behalf of customers, prior to a customer's switch to a CCA. The FF recovers taxes owed to a city in exchange for allowing SCE to utilize electrical distribution lines throughout the property of the city. SCE acts as the collection agency for the FF surcharge which is levied by cities and counties for all customers.
