

SUSTAINABLE ENERGY INCUBATOR

Join us at the next Sustainable Energy Incubator virtual workshop!

In our quarterly Incubator workshops, we cover a range of energy and climate topics to increase the awareness of emerging issues, available tools, resources, and best practices for CPA local member agencies, board members, and other stakeholders.

LOCAL GOVERNMENT: NEXT BIG STEPS TO DECARBONIZING

CPA member agencies will highlight their work in climate action planning and decarbonization. Also, we will hear from a panel of Clean Power Alliance's Community Advisory Committee members on steps that local communities are taking to advance decarbonization.
