## Your power choices.

Choose the energy source and rate plan that's right for you.

This is an annual mailer from Clean Power Alliance and Southern California Edison (SCE) that allows you to compare your rate choices and the sources of your energy and select the option that best suits you or your family.

For more information: call Clean Power Alliance at 888-585-3788 or visit [cleanpoweralliance.org](http://cleanpoweralliance.org), or call SCE at 800-974-2356 or visit [sce.com/cca](http://sce.com/cca).

# Understanding your energy choices.

The purpose of this mailer is to help you make a comparison between Clean Power Alliance and SCE rates and see the renewable energy mix of each to decide which service and rate works for you. The charts below illustrate the estimated electricity costs for a typical residential customer with an average monthly energy use of 594 kilowatt hours (kWh). This comparison is based on Clean Power Alliance rates approved by its Board of Directors and effective as of July 1, 2021. SCE rate options are based on rates effective October 1, 2021. Both Clean Power Alliance and SCE's rates are subject to change.

2021 Schedule Domestic-CARE Comparison

Monthly Usage: 594 kWh

SCE rates current as of October 1, 2021. CPA rates current as of July 1, 2021.

SCE's 50% and 100% rates are open to all customers, subject to participation caps. All of CPA's rate products are open to all customers.

**Generation Rate** reflects the cost of producing or purchasing electricity to power your home. This rate will vary depending on your service provider and rate plan.

**SCE Delivery Rate** is a charge assessed by SCE to deliver electricity to your home. This rate depends on usage.

**Surcharges** represent the Cost Responsibility Surcharge (CRS) and Franchise Fee (FF) that are applicable to Community Choice Aggregation (CCA) customers and SCE customers that elect a Green Rate. The CRS is a surcharge to recover costs associated with power purchases made on behalf of customers, prior to a customer's switch to a CCA or SCE Green Rate. The FF recovers taxes owed to a city in exchange for allowing SCE to utilize electrical distribution lines throughout the property of the city. SCE acts as the collection agency for the FF surcharge which is levied by cities and counties for all customers.
