

Clean Power Alliance Discontinued Legacy/Time-of-Use (TOU) Rates

Overview:

Discontinued Time-of-Use (TOU) rate plans (also referred to as “legacy” rates) are rate plans that are no longer available to Clean Power Alliance (CPA) customers. As a background, Southern California Edison (SCE) has been mandated by the California Public Utilities Commission (CPUC) to migrate residential TOU legacy customers to current TOU rates beginning November 2021 and concluding in 2024. The discontinued rates include **TOU-D-A, TOU-D-B and TOU-D-T**.

The On-Peak periods of these expiring rate plans no longer align with the time of day when the grid is under the most pressure and energy is most expensive to deliver. Effective December 2021, CPA customers on these discontinued rates will be automatically migrated to one of the current residential TOU rates, **TOU-D-4-9PM, TOU-D-5-8PM, or TOU-D-PRIME**, for both their SCE delivery charges and their CPA generation charges.

Legacy Net Energy Metering (NEM) Migration

In addition, SCE has been mandated to migrate residential and non-residential solar legacy customers (also known as Net Energy Metering (NEM) customers) on discontinued rates beginning in November 2021 and concluding in 2027. CPA NEM customers on discontinued TOU rates will be migrated to current TOU rates when their NEM legacy eligibility expires, from 2022 through 2024 for residential and 2022 through 2027 for non-residential accounts.

More information about discontinued TOU rates is available at <https://www.sce.com/residential/rates/discontinued-rate-plans>.
