

Analyst, Power Supply

Who We Are

[Clean Power Alliance](#) (CPA) is Southern California's locally operated non-profit default electricity provider for 32 communities within Los Angeles and Ventura counties and the 5th largest electricity company in the State of California. We provide clean renewable energy at competitive rates to over three million residents and businesses through approximately one million customer accounts.

What You'll Do

CPA is seeking a motivated, highly organized, and detail-oriented Analyst, Power Supply to provide operational, analytical, compliance, and other support to our growing Power Supply team, as we advance clean energy goals in a way that adheres to the local priorities of our member agencies.

The Power Supply team performs various functions related to the development and management of CPA's energy supply portfolio, including procurement of renewable, carbon free, conventional energy, demand response, and resource adequacy products to contribute toward CPA's target portfolio mix, comply with CPA's hedging strategies, achieve regulatory and legislative targets, and maximize benefits for CPA's customers.

This is an outstanding opportunity to work at an important intersection of energy and climate policy in California, helping to restructure Southern California's energy market to rapidly reduce greenhouse gas emissions and provide local choice in energy supply and services.

Who You'll Work With

The Analyst, Power Supply will report to the Senior Manager, Market Operations. You will work closely with the power supply team, regulatory team, finance team, scheduling coordinator, and other consultants as assigned.

Commitment to Diversity

At CPA, we value diversity and are committed to creating an inclusive environment for all employees. We represent a diverse customer base and intend to hire employees that reflect our communities. Clean Power Alliance provides equal employment opportunities to all applicants

for employment and prohibits discrimination and harassment of any type without regard to race, color, religion, age, sex, national origin, disability status, genetics, protected veteran status, sexual orientation, gender identity or expression, or any other characteristic protected by federal, state, or local laws.

Culture

CPA fosters a culture of open communication, responsibility, intellectual curiosity, and exceptional judgment. As a small team that has quickly built the largest Community Choice Aggregation program in the country, high levels of trust, collaboration, and mission alignment are key factors in success. We value fact-based creativity in our work, accountability with our stakeholders, and promote ethical engagement and diversity with our brand.

Successful Candidates Must Demonstrate the Following Abilities:

- High attention to detail with strong organizational skills.
- Handle multiple priorities to meet deadlines and escalate key issues.
- Work accurately and swiftly under pressure.
- Demonstrate good judgement and integrity.
- Communicate effectively, orally and in writing.
- Have a high tolerance for uncertainty but know how to bring things to resolution.
- Possess a strong work ethic and be comfortable taking initiative while working in a fast paced, start-up environment.

Duties and Responsibilities

The Analyst, Power Supply will assist with functions across the department, including:

- **Market Operations:** Supporting various activities related to CPA's management of its clean energy fleet, including outage management, market monitoring, and resource data validation.
- **Portfolio Performance:** Preparing various reports related to energy markets and CPA's portfolio performance.
- **Demand Response:** Support daily monitoring of CPA's demand response programs.
- **Compliance:** Prepare responses to data requests and compliance filings.
- **Data Management:** Supporting management of contract data within CPA's data warehouse, including deal entry and validation.
- **Settlements:** Assist with review and validation of weekly CAISO and other bilateral counterparty invoices.
- Perform other duties as assigned.

Qualifications

- Candidates must have a bachelor's degree.
- At least one (1) year of experience in the energy industry and/or electric utilities.
- Demonstrated interest in North American electricity markets and California decarbonization.
- Ability to sit at a desk and work on a computer for prolonged periods.

Required Skills

- Ability to handle multiple priorities to meet deadlines and escalate key issues.
- Ability to work well with diverse teams and consultants. Be able to thrive in a highly collaborative setting.
- Proficient with Microsoft Office Suite (including Excel and PowerPoint) and data visualization tools (Power BI) or related software.
- Experience with data analysis tools such as R, Python and SAS is a plus.

Work Location

This position is eligible for either Hybrid or Remote options. The Hybrid option requires 2-3 assigned days in the Downtown Los Angeles office and includes an enhanced transportation allowance. The Remote option requires in-person attendance at organization or team-wide events 3 times per year for 3-5 days per event with mass transportation reimbursement for travel within Southern California.

Salary and Benefits

The salary range for this position is \$80,072 - \$107,208, with exact compensation to be determined by Clean Power Alliance, dependent on experience. Benefits include health care, a 401(k)-like match program, paid vacation, and sick leave. This is not a civil service position; however, all CPA employees are required to submit a Statement of Economic Interests form, also known as the Form 700.

How to Apply

Candidates should apply at <https://www.linkedin.com/jobs/view/3179342310>

The start date for the position is as soon as possible and will remain open until filled.
