Clean Power Alliance’s (CPA) 100% Green Power product covers 100% of your electricity usage.

The State of California mandates that all utilities meet their Renewable Portfolio Standard (RPS) annual requirement in the goal of increasing statewide renewables. 38.5% of CPA’s 100% Green Power product fulfills this year’s CA RPS requirement, with the remaining 61.5% being voluntarily procured by CPA to advance our clean energy goals. 100% percent of the product’s renewable content is Green-e® Energy certified for those Commercial and Industrial customers who have opted into the program.

In 2022, 100% Green Power will be made up of the following new renewable resources averaged annually.

<table>
<thead>
<tr>
<th>Resource Type</th>
<th>Voluntary Renewables (Green-e®)</th>
<th>Voluntary Generation Location</th>
<th>Green-e® Energy Eligible State Mandated Renewables (CA RPS)</th>
<th>Green-e® Energy Eligible State Mandated Resource Location</th>

Total Green-e® Energy Certified New Renewables 100%

1. These figures reflect the renewables that were delivered to the 100% Green Power customers in 2022.
2. New Renewables come from generation facilities that first began commercial operation within the past 15 years.

For comparison, the current average mix of resources supplying Southern California Edison (SCE) includes: Renewable (31.4%), Nuclear (9.2%), Natural Gas (22.3%), Hydroelectric (2.3%), Other (0.2%) and Unspecified sources of power (34.6%). This resource mix was prepared in accordance with the California Energy Commission Power Source Disclosure program.

The average home in California uses 542 kWh per month. Source: U.S. EIA, 2021
